DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 recites the limitation "the insulation glue" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 – 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Wasmer et al..

Wasmer et al., U.S. Patent No. 5,005,069, discloses a semiconductor device. As shown in the embodiment of Figure 4, the device comprises a nail head 72 that has a bonding end and a leading conductor 70. A meal base 62 has a cavity 64 in which a bonding stage 65C is located. Semiconductor chip 66 is installed on the bonding stage 65C with one side connected to the bonding stage and another side connected to the

nail head 72. Fence 80 forms a well around the bonding stage and the metal housing has an inner sidewall 85 around the well and enclosing the cavity. The fence 80 extends slantingly from the bonding stage 65C toward the inner sidewall. The semiconductor chip is surrounded by the passivant 78, which is constrained by the fence. The cavity is filled with a buffer material 88. The passivant 78 is described as being polyimide or silicone rubber.
